MOOD SCORE

handlog.app

The Reflective One

Journals occasionally but never goes back to read it. Wants to understand their own patterns — emotions, energy, relationships — without the effort of a therapist.

"I write a lot but I never know what it all means."

The Busy Person

Life moves fast. Meetings, family, decisions. Wants to capture the day in 2 minutes — voice note on the way home — and have something meaningful to look back on.

"I forget what happened last week, let alone last year."

The Self-Builder

Tracks habits, reads self-improvement books, wants data on themselves. Mood scores, people patterns, energy trends — they want the dashboard of their own life.

"I want to see myself the way data sees me."

Most journals *never get read again.*

We write, we forget. There's no structure, no reflection, no way to see the patterns in your own life — until now.

1 No structure

Free-form notes pile up with no summary, no themes, no meaningful takeaways.

2 Too much friction

Opening an app, typing a full entry — it feels like homework. Most people stop within a week.

3 No reflection

Without review, journaling is just venting. The growth comes from looking back — but nobody does.

Three steps. *Effortless habit.*

1

Capture

Speak or type freely — what happened, who you saw, how you felt. No format required. Voice transcription included.

2

AI Reviews

Every week, AI reads your entries and writes a structured review — key events, mood score, themes, and personal reflections.

3

Auto-Saved

Everything syncs to your Notion workspace automatically. Your memories, organised exactly the way you like them.

Your life, *visualised*.

8.2

AVG MOOD SCORE

Daily, weekly & monthly mood tracked from 1–10.

47

ENTRIES THIS MONTH

Voice + text. Short is fine. Consistency is everything.

12

PEOPLE MENTIONED

Timeline tracks every person in your life story.

3×

REVIEW TYPES

Daily · Weekly · Monthly — all AI-generated, all in Notion.

Everything you need,
nothing you don't.

Voice Capture

Record a voice note, and Whisper AI transcribes it instantly. Log your day in under 60 seconds.

Weekly Review

AI reads your week and generates a full narrative review — with highlights, patterns, and a mood score.

Deep Chat

Ask your AI about your own life. "Who did I see most this month?" "What made me stressed in November?"

Mood Dashboard

Visual mood tracking across weeks and months. See your emotional patterns at a glance.

Timeline

Browse your life story chronologically — every entry, every review, every person you mentioned.

Notion Sync

All your notes and reviews auto-save to Notion. Your data, in your workspace, always.

Ask your AI
about your life.

Your journal knows you. Ask it anything — your AI has read every entry and can surface insights you never noticed yourself.

HandLog

YOU

"Who did I spend the most time with in May?"

HANDLOG AI

"Based on your May entries, you mentioned Sarah 11 times — mostly around work projects and two weekend brunches. You also spent significant time with your sister during the 18th–22nd."

YOU

"What's been making me stressed lately?"

HANDLOG AI

"Your last 3 weeks show a recurring theme around deadlines and sleep quality. Mood scores dip noticeably on Sunday evenings — you mentioned work pressure 8 times this month."

See it working.

Every page has one job — capture, review, reflect, or explore. Daily, weekly & monthly reviews, all AI-generated.
